

IE 403: User perception and Experience of using E-banking Apps

Param | Ashish | Het | Jyot

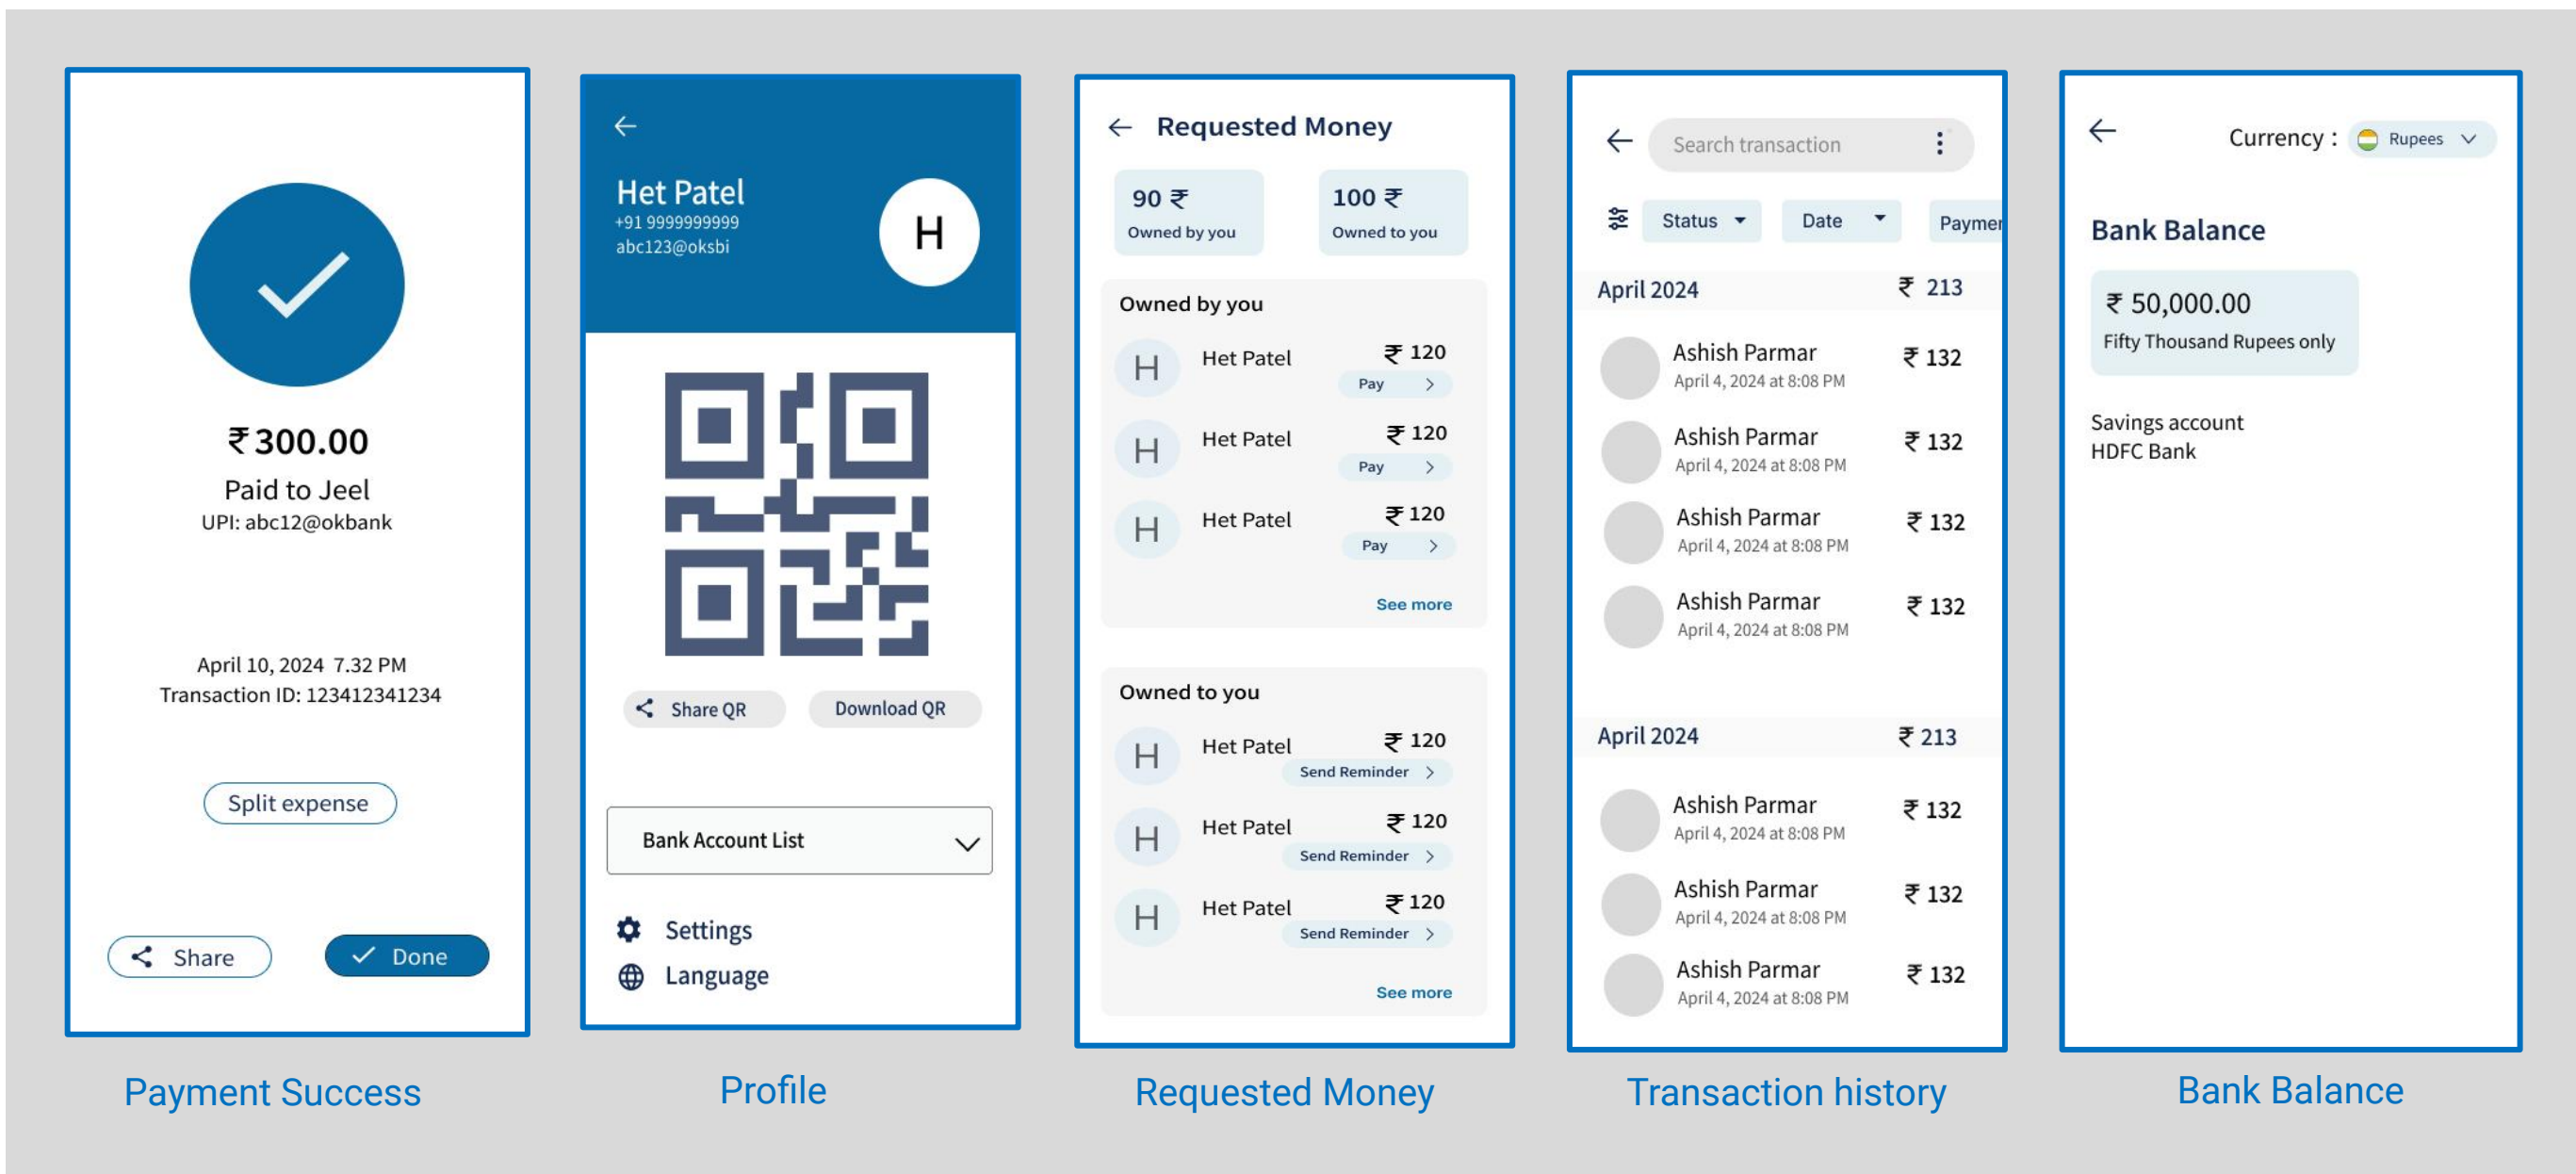

Overview

- Excessive buttons confuse users
- Common features require more steps

Our Solution

Homepage:
All essential and required features on home page, no scrolling required

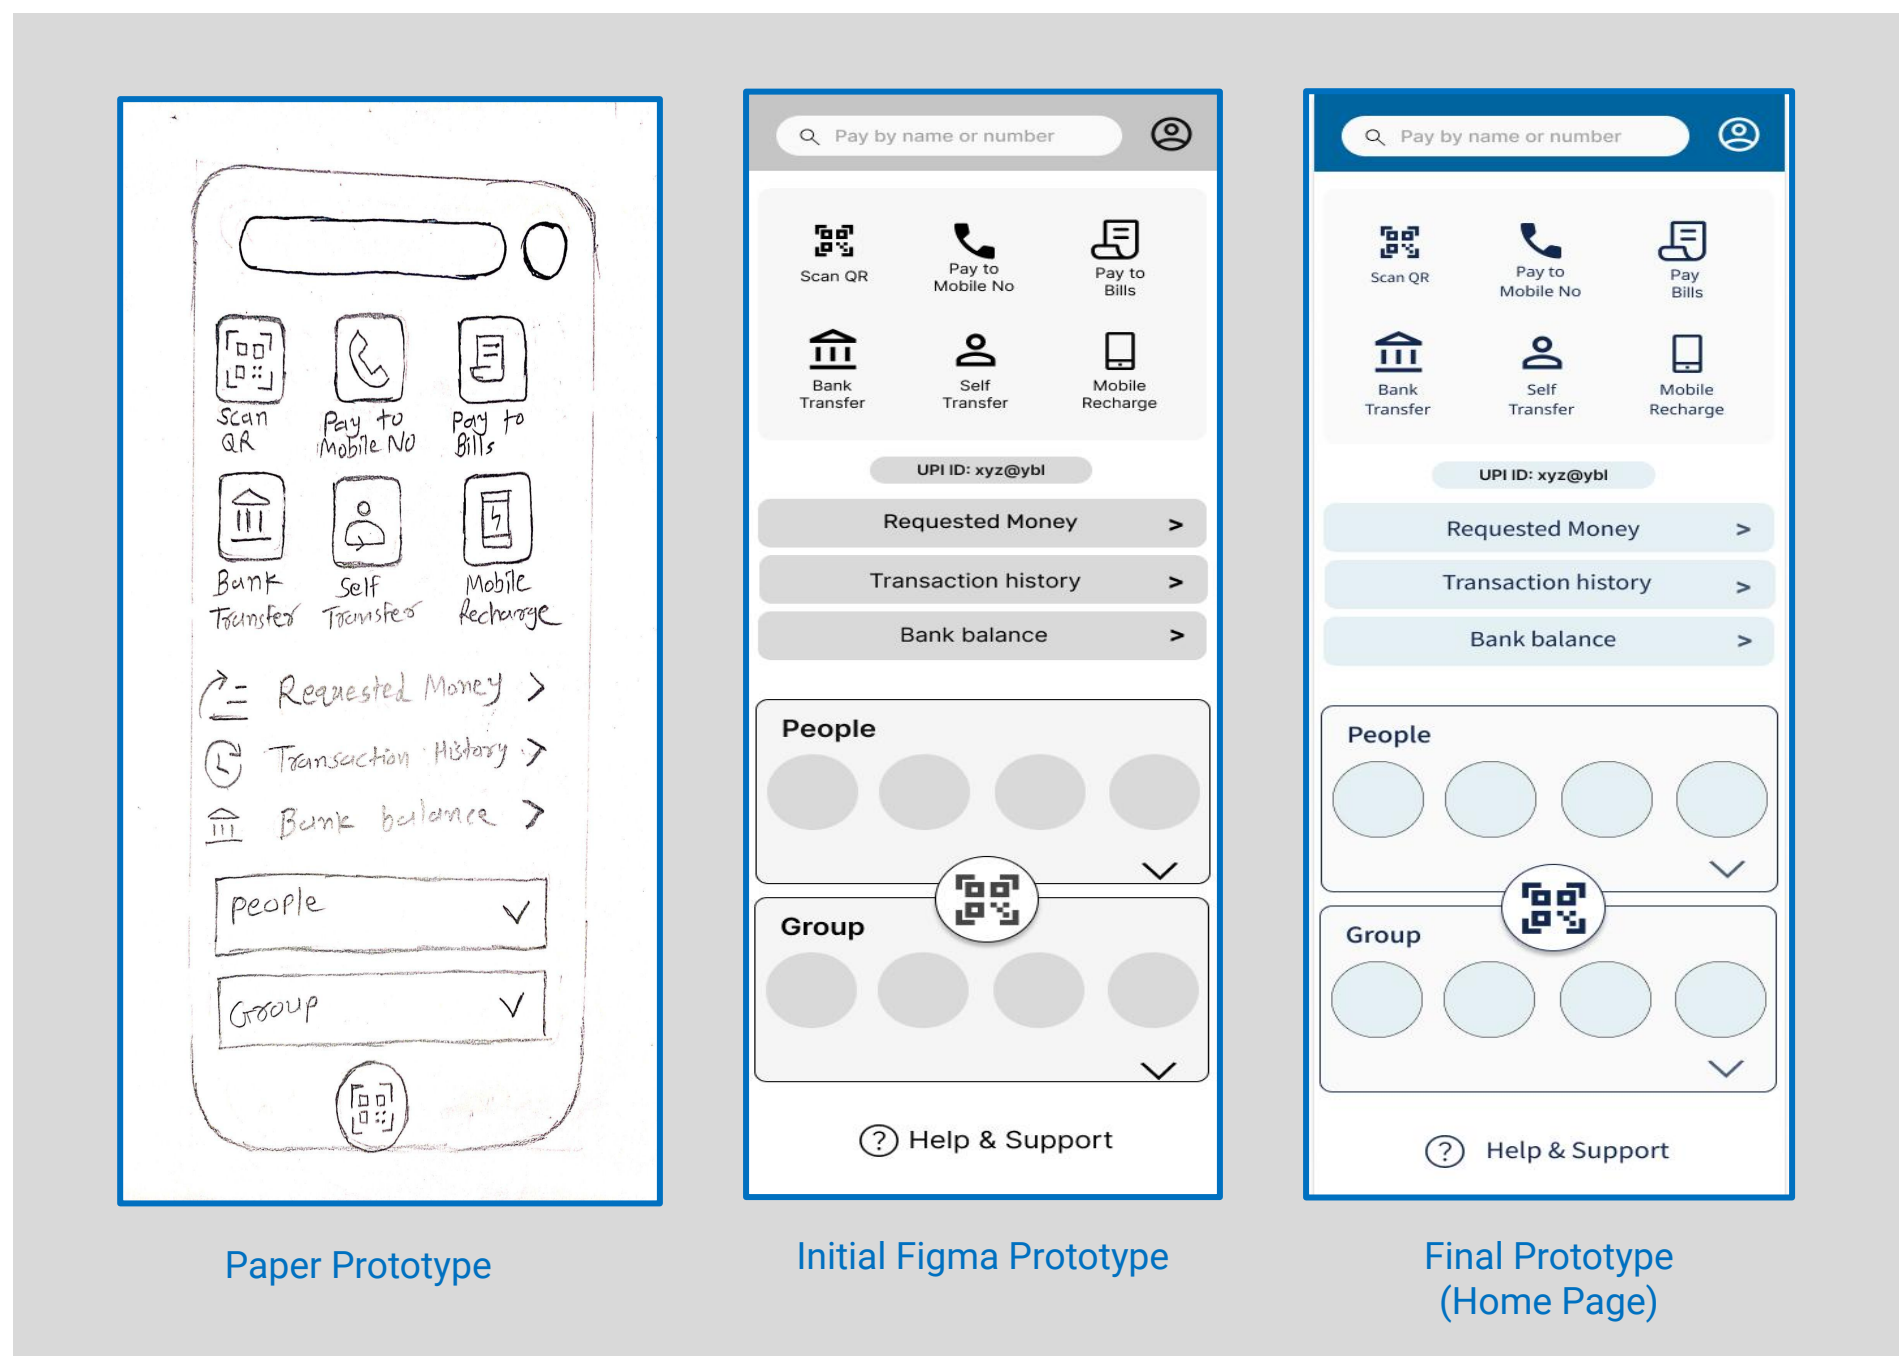

Requested Money:
All your pending requests you can see here.

Filter in transaction: You can filter out your transactions using filters like payment status, date, method, amount etc.

Bank balance: You are able to see your account balance in number as well as in words and in any currency you want.

Split expense: You are able to immediately split your transaction with the people.

Design Iteration

- Paper prototype then converted into wireframe and added colour into it.

- Overall focus:**

Simple User interface

Easy navigation for frequently used features

Added some more features which can make user experience better.
